RESEARCH INTERESTS

International Macro (Information Frictions, Expectation Formation, Monetary Policy)

Financial Stability (Macroprudential Regulation)

EDUCATION

University of Lausanne - HEC, Department of Economics, Switzerland 09/2018 - Today

Ph.D. in Economics

- Thesis Title: "Essays in Frictions in Macroeconomics"
- Expected Completion Date: Summer 2023
- Advisors: Kenza Benhima and Adrian Bruhin

Study Center Gerzensee, Switzerland

09/2018 - 08/2019

Swiss Program for Beginning Doctoral Students in Economics

University of Lausanne - HEC, Switzerland

09/2016 - 07/2018

Master of Science in Economics

University of Bern, Switzerland

09/2012 - 06/2015

Bachelor of Science in Economics

ONGOING RESEARCH

Inflation Expectations, Perceptions and News Media: Regional Differences in Switzerland, [Job Market Paper](#)

Abstract: This paper studies newspaper inflation reporting and its effects on inflation expectations and perceptions in Switzerland. We create a standard quantitative inflation news measure and a novel qualitative measure of inflation sentiment for newspapers written in two national languages. We find that newspapers written in French report significantly more about an inflation increase compared to a decrease and German newspapers report more negatively about an inflation decrease. Using regional inflation expectations and perceptions from a national household survey, we exploit the language barrier in Switzerland to study the effects of inflation news reporting. We find that both the quantitative and the qualitative news measure affect perceptions and expectations. Additionally, we document socio-demographic differences in the response of expectations and perceptions to news.

Dissecting the Home Bias in Survey Expectations, *with Kenza Benhima*

Abstract: One of the leading potential explanations of the home bias in asset holdings and of capital flow volatility is the asymmetry of information between local and foreign agents. We provide direct evidence of this asymmetry by looking at survey expectations. Using individual GDP growth and inflation forecasts by professional forecasters for a panel of emerging and advanced economies, we show that foreign forecasters make more mistakes than local forecasters. This finding is consistent across country and forecaster types and across sub-periods. This "home bias" in expectations is not due to a more irrational expectation formation by foreigners, but to local forecasters' more precise information. Besides, consistent with a standard noisy information model where foreigners and locals observe the same public signals but locals have more precise private signals, foreign forecasts react more to public signals than the local ones. On the methodological side, we provide tests that identify differences in information frictions across groups.

The Effect of Macroprudential Policies on Homeownership: Evidence from Switzerland, *with Adrian Bruhin, Andreas Fuster and Maja Ganarin*

Abstract: This paper analyzes how the introduction of macroprudential policies in the Swiss residential mortgage market affected the propensity of households to become homeowners. We exploit a unique administrative data set of individual tax records containing detailed financial and socio-demographic information. We show that the mean share of renter households transitioning into homeownership decreased from 3.4% per year in the five years prior to the introduction of macroprudential policies to 3.0% per year in the five years afterward. This decrease is more pronounced for young and middle-aged households with relatively low income and wealth, suggesting that it is at least partly due to a tightening in borrowing constraints. Moreover, intergenerational transfers in the form of predeath bequests have become more important for homebuying both at the extensive and intensive margin. As family wealth is heterogeneous, the introduction of macroprudential policies may entail distributional consequences.

RESEARCH EXPERIENCE

| | |
|--|-------------------|
| Central Bank of Ireland , Dublin, Ireland <i>Ph.D. Intern</i> , Macro Financial Division | 11/2022 - 04/2023 |
| Institut d'économie appliquée (CREA) , Lausanne, Switzerland <i>Scientific Collaborator</i> , Forecasting | 02/2018 - Today |
